Profile Full Stack Developer with QA Analyst experience.

Experience **01/18 – 06/19** **Quality Assurance Analyst**

Living Social, New York, NY

- Thoroughly tested large scale, web-based consumer applications across multiple browsers and platforms within an agile development environment
- Ensured the quality of all products by performing functional, accessibility, cross-browser, and regression testing
- Effectively triage, prioritize, and test fixes for bugs found during development cycles, and occasionally in production
- Prepare and develop test strategies, cases, and plans
- Documented defect/issues in HP ALM defect Module, including relevant brief descriptions of the issue with detailed steps to replicate
- Wrote and executed test cases on major features of the application: Travel, Activities, Emails, and etc
- Planned and executed functional, integration, regression, usability, compatibility, system and performance testing
- Tested native mobile application
- Worked with MySQL relational database
- Worked in agile environment, frequently using Change Requirements Requests
- Provided practical creative input to the software design and specification process
- Reviewed bug reports filed by clients (in production environment) and created consistently reproducible test cases
- Environment: Windows, MacOS, iPad, iPhone, Android, Java, MySQL, and Jira BTS

Skills HTML & CSS, JavaScript, jQuery, Bootstrap, Firebase, Node.js, Jira, MySQL
